

Intake for the Bio Resonance Evaluation

[The eval cannot be completed without the info marked with an *]

*Client / person being evaluated: _____ *Gender: _____

*Date of Birth: _____ Place of Birth: _____

Blood Group: _____ Rhesus factor: + / -

*Address: _____

*Phone: _____ Text: _____

*Responsible person name and email: _____

*I understand this is a private pay engagement: _____

Referral source: (how did you hear about us?) _____

*All Surgeries: none

*Chief Complaint(s):

*Reason for the Evaluation Request (what problem are you trying to identify or solve):

Current Diagnoses:

Naturopath contact info:

Name: _____

Phone: _____ Email: _____

Occupational Therapist contact info:

Name: _____

Phone: _____ Email: _____

*Choose the type of eval and treatment (if wanted):

- Screening (\$35) Basic (\$275) In-depth (\$675)
 Treatment (\$60 / META 15 min session) #Sessions ___/week
 Individualized Bio-Resonance Remedy (\$25 per bottle mailed)

Experiencing a Bio Resonance Evaluation (Screening)

this is a screening to tell if there are bio-resonance signatures that should be further investigated

- ☑ Screening for the Covid 19 bio-resonance signature in your mouth, nose and lungs
- ☑ Screening for the bio-resonance signature and thus presence of intestinal Parasites and amoebas.
- ☑ Screening for the bio-resonance signature of environmental toxins such as heavy metals

Basic Bio Resonance Evaluation

The eval will check for:

- ☑ Intestinal Parasites in particular round worms and pin worms with a diagrammatic plotting of their presence.
- ☑ Toxins found. These include noting any food allergens, environmental toxins and heavy metals affecting function
- ☑ The presence of strep particularly Group A Beta Hemolytic Streptococci and (Ig)G – to help know if PANS or PANDAS should be more fully investigated
- ☑ Vagus Nerve status to determine the extent of the fight or flight response present in the neural system with pictures of the nerve's status
- ☑ Areas of the body that could possibly have subclinical infections that are affecting behavior and function
- ☑ The top amino acids that are too low
- ☑ Vitamin supplements you can take to help your body right now.

In depth Bio Resonance Evaluation & initial Meta Therapy Treatment

The eval will check for:

- ☑ All the above basic resonance eval factors
- ☑ Identification of the emotional components affecting physical and / or behavioral (dys)-function
- ☑ Scan of 4 brain areas and 1 META treatment of each
 - Brainstem
 - Cerebellum
 - Thalamus
 - Prefrontal Cortex
- ☑ Evaluation of each of the following systems identifying the top areas of concern
 - Digestive system
 - Respiratory
 - Urinary tract
 - Heart
 - Circulation
 - HPA axis
 - Neurological systems
 - Specialized sensors
 - Locomotion
- ☑ List of meridians that would be beneficial to work on
- ☑ Healy microcurrent recommendations
- ☑ Meta therapy Treatment completed on your most affected area 1x.

Meta Therapy Treatment

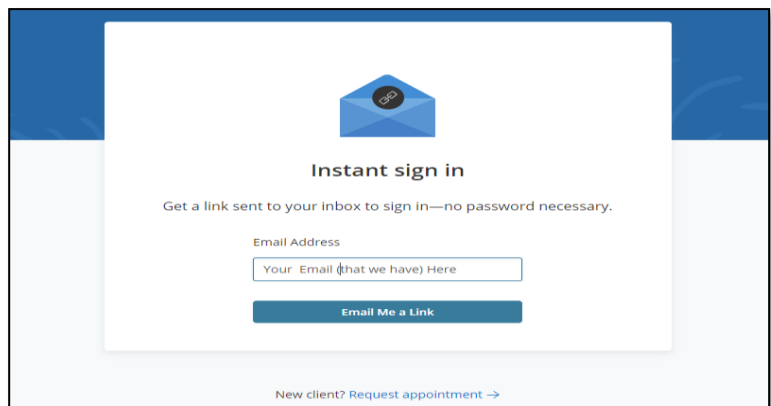

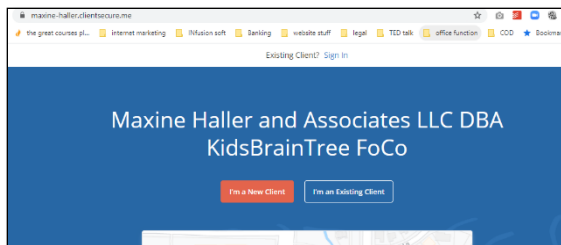

- This can be done in my office or as a zoom treatment.
- META therapy is the application of frequency treatment to influence the current dysfunctional frequencies of tissues, so that they can heal. This requires specialized equipment that can create and use scalar waves. This technology was initially discovered, and its uses found by people like Tesla, Einstein and Voss. From Albert Einstein: "Future medicine will be the medicine of frequencies."
- It will be best to choose how many sessions you want and how many areas you want to address. It takes 15 minutes to fully address one area.
- Having the bio-resonance remedy is very helpful for maintaining the gains made by the META therapy. The frequency that is established in the META therapy session is imprinted in the remedy for each area treated, and the body is reminded each time it takes the remedy that it should be vibrating at this perfect frequency to be healthy. Restoration of the parts treated is influenced by many factors including thoughts and feelings.

Sending the samples to complete the order

- A. For all evaluations you will need to complete the intake form. Without that information we cannot do the evaluation as there are parameters we need to enter into the bio-resonance evaluation program.
- B. We will need samples of the following:
- Finger nails** [we prefer without nail polish but it does not matter if there is some]
 - Hair** [cut as close to head as possible. We need a lock, not just a stand.]
 - Saliva** [Wet a Q-tip, rub on the inside of the cheek a bit and place it in the baggy]
- C. Place each sample in a separate zip lock baggy.
- D. Label each of the bags with:
- Name:**
 - Date of birth:**
 - Gender:**
 - Blood type** (if you know it):
- E. Mail it to:
- Maxine Haller**
7003 Avondale Rd
Fort Collins CO 80525
- Use a bubble wrap envelope
Mailing FedEx or UPS is the surest, but USPS does also get here. Just slower.
- F. Text me at 970-818-8768 that you have sent it. Don't forget to tell me who you are when you text.
- G. Please make sure that you have completed the online paperwork and demographic info via your portal from Simple Practice for Maxine Haller and Associates / Kidsbraintree Foco
- H. Please check back in your portal for when your evaluation has been scheduled to take place. This will only happen after we have received the samples. You will however be charged the date you have ordered the test. No test will be done without a credit card on file. So please complete the pporatf documents as soon as possible.
You will need to set up a 15-minute feedback slot as soon after the scheduled evaluation as possible - at which time your written eval will be placed in your portal.

Bio Resonance Analysis Whole body Scan Technology

The Medicine Way Software can uniquely assess organ and system imbalances via Bio-Resonance. Every cell, tissue, organ and system in our body has a resonating frequency. Much like an orchestra. If one area of the body gets out of tune, it affects that individual's entire performance or proper function.

The bio-resonance scanning evaluates the frequencies within the body, and thus can locate areas of stress or malfunction within a system by identifying frequencies associated with differing states and dysfunctions, even identifying the bio-resonance signature of bugs and parasites .

It can identify tissue frequencies that are not optimal before symptoms of disease occurs. Therapy can then be determined for personalized needs. This includes homeopathic and imprint remedies. Other interventions for stressors can also be recommended. The process is non-invasive and radiation free.

Common causes of stress that can lead to dysfunction include Bacteria, Viruses, Parasites, Toxins and even too much Electro Magnetic exposure. System imbalances can be found in any of the body systems: Skeletal, nervous, muscular, respiratory, circulatory, digestive, urinary, lymphatic, sensory even hormonal.

The sensitivity of identifying a bio-resonance signature is very precise. It will identify beginning dysfunction long before medical diagnostics will. Be aware that medical diagnostics identify pathology and pathological conditions. This system identifies the initial stress response and the initial difficulty regulating in the system, organ or cell. The goal is to identify where homeostasis has been disrupted and where the body has weak areas. Disrupted homeostasis is the precursor to disease and pathology. It is often correctable before disease and degeneration are evident enough for a medical diagnosis. We therefore make no claims for diagnosis or the treatment of medically diagnosed conditions.

The contributing causes to the homeostasis disruption are vast and many are not under our control, but we have developed ways of optimizing outcomes and re-establishing homeostasis, of advising clients what to look more closely at and of creating outcomes that work together with clients goals. We use the bio-resonance signature of specific states to direct us to the source of dysfunction. Solutions may vary and are often not medical in nature.
